1 Specialized Dynamic Optimizations for High-Performance Energy-Efficient Microarchitecture

Yoav Almog, Roni Rosner, Naftali Schwartz, Ari Schmorak

March 2004 **Proceedings of the international symposium on Code generation and optimization: feedback-directed and runtime optimization CGO '04**

Publisher: IEEE Computer Society

Full text available: pdf(249.00 KB) Additional Information: full citation, abstract, index terms

We study several major characteristics of dynamic optimizationwithin the PARROT power-aware, trace-cache-basedmicroarchitectural framework. We investigate thebenefit of providing optimizations which although tightlycoupled with the microarchitecture in substance are decoupledin time.The tight coupling in substance provides the potentialfor tailoring optimizations for microarchitecture in amanner impossible or impractical not only for traditionalstatic compilers but even for a JIT. We show that t ...

2 Pin: building customized program analysis tools with dynamic instrumentation

Chi-Keung Luk, Robert Cohn, Robert Muth, Harish Patil, Artur Klauser, Geoff Lowney, Steven Wallace, Vijay Janapa Reddi, Kim Hazelwood

June 2005 **ACM SIGPLAN Notices , Proceedings of the 2005 ACM SIGPLAN conference on Programming language design and implementation PLDI '05**, Volume 40 Issue 6

Publisher: ACM Press

Full text available: pdf(300.61 KB) Additional Information: full citation, abstract, references, index terms

Robust and powerful software instrumentation tools are essential for program analysis tasks such as profiling, performance evaluation, and bug detection. To meet this need, we have developed a new instrumentation system called *Pin*. Our goals are to provide *easy-to-use, portable, transparent*, and *efficient* instrumentation. Instrumentation tools (called *Pintools*) are written in C/C++ using Pin's rich API. Pin follows the model of ATOM, allowing the tool writer to analyz ...

Keywords: dynamic compilation, instrumentation, program analysis tools

3 Dynamic Adaptive compilation: An infrastructure for adaptive dynamic optimization

Derek Bruening, Timothy Garnett, Saman Amarasinghe

March 2003 **Proceedings of the international symposium on Code generation and optimization: feedback-directed and runtime optimization CGO '03**

Publisher: IEEE Computer Society

+"ieee 754" +eflags

Search

Nothing Found

Your search for **+"ieee 754" +eflags** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

  ```
  sales offices
  ```

  You can also enter a full question or concept in plain language.

  ```
  Where are the sales offices?
  ```

- Capitalize proper nouns to search for specific people, places, or products.

  ```
  John Colter, Netscape Navigator
  ```

- Enclose a phrase in double quotes to search for that exact phrase.

  ```
  "museum of natural history" "museum of modern art"
  ```

- Narrow your searches by using a + if a search term must appear on a page.

  ```
  museum +art
  ```

- Exclude pages by using a - if a search term must not appear on a page.

  ```
  museum -Paris
  ```

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

```
museum +"natural history" dinosaur -Chicago
```
